Assignment 0501 Feedback

Abdulrahman M. Alzaid   *AbdulZaid / mr.d7oom@gmail.com*

1a — One can never issue too many commands **:)** (**+**)

1b — You transcribed your activity accurately and completely. (**+**)

2e — You performed some degree of byte-level navigation, but there are enough inconsistencies in your report to cast doubt on how much you truly understood this. In some cases, it is easy to just jump to conclusions because a data block has recognizable data, without knowing how to determine that data block based on directory and inode information. (**/**)

4d — You were able to use the information presented to a degree, but assorted glitches in your bit-level navigation show that you didn't use that information in full. (**|**)

4e — Two commits is on the low side but defensible; messages for those commits are descriptive. (**+**)

4f — Submitted on time. (**+**)
